DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art shows a retractable control knob comprising a hub, grip, locking mechanism, elastic element, closed chamber and sliding seal (DE '422). However, the prior art fails to show the combination of each of the above elements where the closed chamber is defined by side walls and an end wall of the hub where the grip further includes a rod extending into the chamber and a sleeve coaxial to the rod slidably fitted on an outer surface of the hub. This arrangement eliminates the need for a separate dampening means that are required by DE '422, and results in space savings.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
